

Dear Evona and Christopher

I thought you would like to see some of the progress as we're installing at school.

Unboxing of Panels:

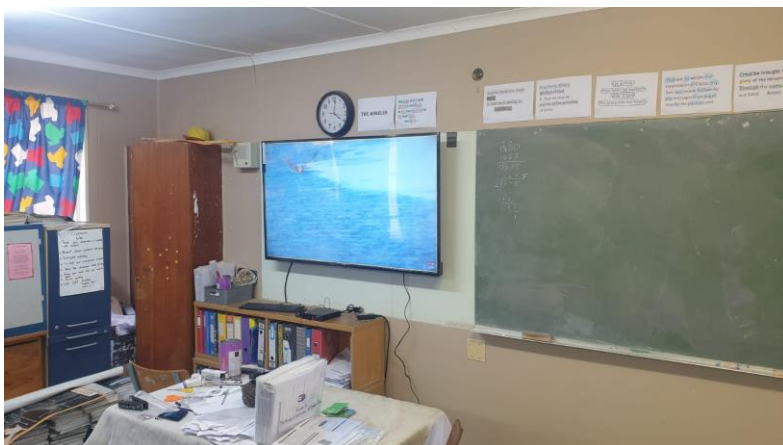

Preparing of spaces:

Testing equipment:

The Gr 3 teachers happened by and started experimenting.

Getting closer to the final product:

I must say the screens are better than we anticipated, the quality is excellent and I'm very pleased with the micro computers. The system together works very well and if we add a webcam to the story we can do live interactive sessions with other classes (even internationally), which is quite exciting.

We tested this week and will finalise next week because I am busy with a security upgrade to prevent loss. This includes upgrading the gates to the classes, alarm system and I'm pushing for cameras. The first two weeks of school I will be busy with intensive training of the teachers, but in all honesty this is the same as using any computer; it only has a bigger screen. It's the networking features that I will have to teach.

Thank you to everyone who has helped us reach thus far, I am very excited for what the children will experience and where the school is going.

Kindest regards

Jacques Fouche
